TABLE OF CONTENTS

Chapter	Particulars	Page No.
Chapter 1	Introduction	3
Chapter 2	Technology Used	4
Chapter 3	Modules	5
Chapter 4	Images and Code	6-24
Chapter 5	GitHub & Presentation Link	25-26

CHAPTER 1

INTRODUCTION

BabyCare is created on the understanding that quality family care is both a fundamental human need and a key driver of economic growth and empowerment. When children receive quality care in their critical formative years, they are on a path to achievement and success. Women disproportionately shoulder caregiving responsibilities, but when they have supports in place that enable them to work, our economy grows.

BabyCare offers of an array of services that enable families to find, manage and pay for care and provide employment opportunities for caregivers. These include a robust suite of safety tools and resources, easy ways for caregivers to be paid and obtain professional benefits, household tax and payroll services for families, and customized corporate benefits packages covering all child care needs.

- For families, our digital platform provides a simple, comprehensive solution for finding, managing, and paying for family care needs including child care related services.
- For caregivers, we provide a platform for finding high quality jobs, as well as access to benefits that can lead to sustainable, meaningful careers.

CHAPTER 2

TECHNOLOGY USED:

SIMPLE SOLUTIONS FOR COMPLEX INTEGRATIONS

*The next step is to include what metrics
(technologies) has made our website unique. Below
are some metrics we have included:*

1. HTML

2. CSS

3. FRAMEWORK - BOOTSTRAP

4. JAVASCRIPT

5. JQUERY

6. PHP

7. MYSQL

CHAPTER 3

BABY CARE MODULES

- **Home** - We have provided an option to find a caretaker and be one, by filling a form from our homepage. But keep in mind that there is a proper selection process to be a care taker. Apart from that, it connects to all the other pages of our website including the search page, about us page and contact us page.
- **Join** - There is a join page in our website which allows you to find a caretaker and be one.
- **Become a Caregiver** - This link will take you to a form where you have to fill the personal details like first name, last name, contact no., email address, residence details, etc. and can submit it. The form is properly validated using PHP.
- **Find a Caretaker** - This page will take you to a form where you can fill all the details including which type of service you need. You can book the time slot accordingly and can ask for the background details of your care taker.
- **About Us** - This page gives an overview of the website background and the details about the team. A brief introduction including vision and mission of the website is available on the page. It describes how the website is creating job opportunities and at the same time how it is securing futuristic economic growth.

BabyCare.com offers of an array of services that enable families to find, manage and pay for care and provide employment opportunities for caregivers. These include a robust suite of safety tools and resources, easy ways for caregivers to be paid and obtain professional benefits, household tax and payroll services for families, and customized corporate benefits packages covering child care and senior care services.

For families, our digital platform provides a simple, comprehensive solution for finding, managing, and paying for family care needs including child care, senior care, special needs care, pet care, housekeepers and tutors. Additionally, Care.com HomePay provides peace of mind by managing household payroll and taxes for families who employ caregivers.

For caregivers, we provide a platform for finding high quality jobs, as well as access to benefits that can lead to sustainable, meaningful careers.

Our enterprise solution, BabyCare@Work, helps companies provide care benefits to their employees, making it easier to attract and retain talent and increasing productivity and reducing absenteeism and turnover.

BabyCare.com was founded with a conviction that human-centered technology and innovation can address real world social challenges—by enabling access to more efficient and affordable family care, and by facilitating quality jobs for the care workforce. By doing so, we are creating a care infrastructure that allows parents the freedom to integrate work and life, women to pursue more rewarding careers, care workers to achieve financial inclusion and stability, and employers to retain better talent and drive productivity.

Figure 11.7 : Need CareTaker Page

CODE

CODE

CODE

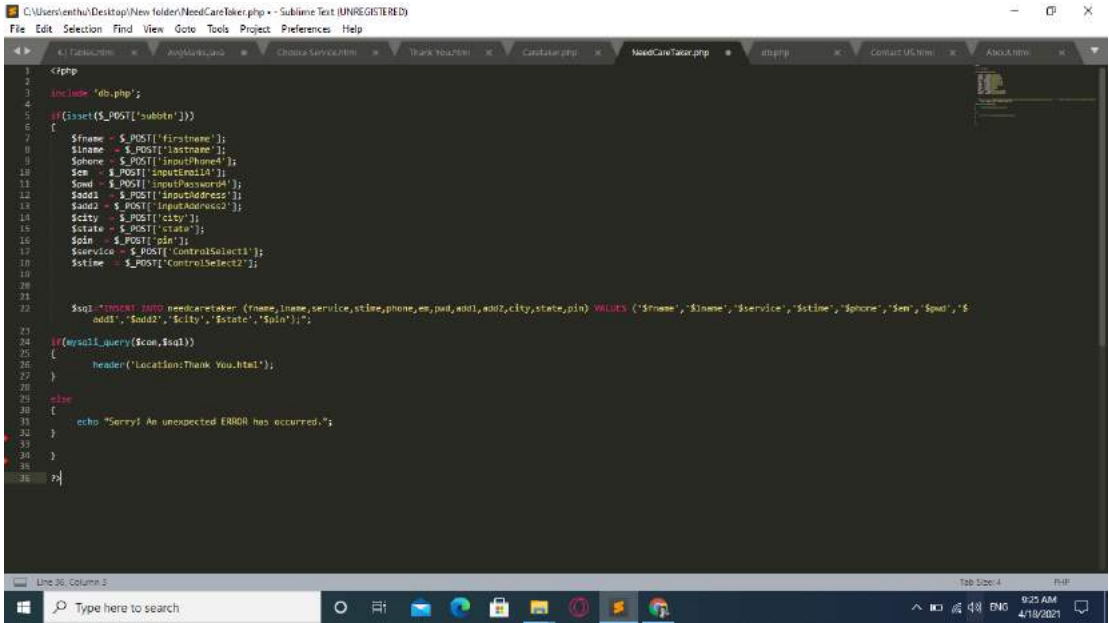

Figure 13.1 : Need CareTaker Code (PHP)

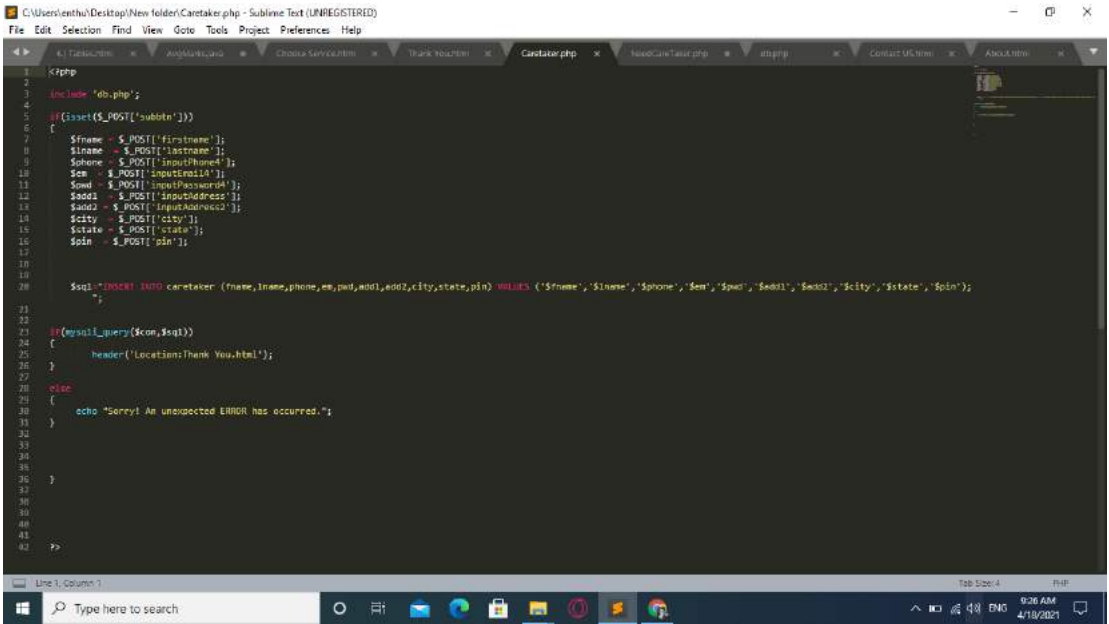

Figure 13.2 : Need CareTaker Code (PHP)

CODE

The image shows a screenshot of a Sublime Text editor window. The title bar indicates the file path is 'C:\Users\esht\Desktop\New folder\db.php - Sublime Text (UNREGISTERED)'. The editor contains the following PHP code:

```
1 <?php
2
3 $con=mysqli_connect('localhost','root','','caretakerdb');
4
5 if ($con===false) {
6     die("my Error is ". mysqli_connect_error());
7 }
8
9
10
11 ?>
```

The code is a PHP script that attempts to connect to a MySQL database named 'caretakerdb' on a local host using the 'root' user. If the connection fails, it outputs an error message and terminates the script. The editor interface includes a menu bar with options like File, Edit, Selection, Find, View, Goto, Tools, Project, Preferences, and Help. The status bar at the bottom shows 'Line 11, Column 3' and the system clock indicates 9:25 AM on 4/18/2021.
